16 SEPTEMBER 2009

9.30 - Opening remarks

Alberto Zuliani

9.45 - The market (quantities, consumers, values) Antonella Baldassarini, Alessio Canzonetti

Estimate the size of illicit drugs market and the impact on gross domestic product, through a demand side and supply side approach.

10.05 - The comparison with the Czech experience

Jiri Vopravil

10.25 - International comparisons

Cloe Carpentier

10.45 – 11.00 Coffee break

11.00 - Estimation models and methods based

on administrative and health care data bases Rossi/ Conti/Scacciatelli/Scalia Tomba/Domingo

- Methods for consumption estimation

(based on waste water analysis)

Ettore Zuccato

(based on supply data)

Carla Rossi

- The Australian experience

Alison Ritter

13.00 – 14.00 Lunch

14.00 - Surveys

The market must be analyzed by means of appropriate systems for each social and demographic group, because drug consumption has different motivations and distribution methods in each of them.

- Stratification of the young population

Mariano Ferrazzano

- Results of Schools and Therapeutic Communities surveys

Luca Di Censi Roberto Ricci

- International comparisons (Monitoring the Future)

Alessio Canzonetti

- The surveys in The Netherlands

Dirk Korf

15.30 – 17.30

ROUND TABLE: Which methodologies for data collection?

(Matthew Hickman, Dirk Korf, Linda Laura Sabbadini, Jiri Vopravil, Ettore Zuccato, Alberto Zuliani,)

17.30 – 18.00 - Discussion and conclusions first day.

17 SEPTEMBER 2009

9.30 – Opening Remarks

Guido M. Rey

9.45 - Legal and illegal economy: price micro-economic models

Giovanni Trovato

10.05 – Macro-economic models

Claudia Costa Storti

10.25 - Grey Zone: a three sectors model

Federico Sallusti, Caius Gavrilă

The model allows us to study both direct and indirect distortions caused by the presence of the illegal sector and by a “grey” sector, where legal goods are produced by means of the capital coming from illegal profits. Particularly, we focus on the different path of technology between the grey and the legal sector in order to include the institutional effects

10.45 – 11.00 Coffee break

11.00 - Simulation on the Italian economy

Roberto Ricci

11.25 - Drug policies and regulation

- **Analysis on the relationships among market and criminal organizations** Federico Sallusti
- **An introductory comment on law enforcement** Krysztof Krajewski
- **Policy-legislation nexus** Freya Vander Laenen
- **A comparative analysis of different situations** Elena Ventura

The reduction of negative impacts on individuals (health, antisocial behavior) and negative impacts on the economy (crime and the costs of health-care and policing) should be the main purpose of drug policy. The comparative analysis of some legislation (Switzerland, Holland, Australia, Portugal ...) aims to understand if those best practices' experiences could be extended into other settings, different to that in which they are created, in order to have the same positive effects.

12.25 – 13.00 - Discussion

13.00 – 14.00 Lunch

14.00 – 16.00

ROUND TABLE: The economic and political influence of the illicit drug industry

(Mark Baynham, Cristopher Doran, Kasia Malinowska-Sempruch, Guido M. Rey, Alison Ritter, Ambros Uchtenhagen)

16.00 – 17.30 - Discussion and conclusions.
